Profile

- I am Jitesh Mali, a passionate Full Stack Developer from Uran, India.
- I specialize in crafting visually appealing and user-friendly websites, with a strong capability for independent project work in web development.
- While I enjoy working autonomously, I also value collaboration and teamwork as essential for achieving exceptional results.
- Outside of coding, I unwind by listening to music, playing video games, and watching movies.
- I am eager to contribute my skills and enthusiasm to a team that values creativity and excellence in web development.

Projects

Horizon | [Live Link](#)

- Horizon is a sleek news website crafted with React and styled using Tailwind CSS, offering a dynamic interface with light/dark modes for enhanced readability.
- It includes features like article favoriting, keyword searches, category filters, and pagination for a personalized reading experience.
- Powered by Redux Toolkit and integrated with the GNews API, Horizon ensures fast content delivery and seamless navigation.
- Error handling is robustly implemented to maintain reliability, making Horizon an ideal choice for a modern and efficient news portal.

CarePulse | [Live Link](#)

- CarePulse is a doctor appointment booking platform designed with Next.js and Tailwind CSS for a responsive interface and enhanced with Shadcn UI components.
- It features SMS reminders via Twilio to reduce no-show rates, an admin dashboard for efficient appointment management, and secure data handling through Appwrite.
- Sentry integration ensures proactive error monitoring for reliable performance.
- Patients can register with their complete information, enabling them to book appointments seamlessly.

NoteEase | [Live Link](#)

- NoteEase is a minimalist MERN Stack note-taking app designed for simplicity and efficiency.
- It offers essential functionalities such as adding, editing, deleting, pinning, and searching notes, all integrated with user authentication via JWT tokens.
- The app's clean and responsive interface, developed with Next.js and styled using TailwindCSS, ensures a seamless and intuitive user experience.

GShop | [Live Link](#)

- GShop is a premium e-commerce platform tailored for gamers, powered by Next.js for robust performance.
- Integrated with Sanity CMS for efficient content management and styled with Tailwind CSS for a sleek design, GShop offers an immersive shopping experience.
- Users can explore a diverse library of games, easily add items to their cart, and customize quantities, all within a user-friendly interface that includes a stylish dark mode option.
